

June 2026

Caterpillar 3500/3600/G3500 PHE Gaskets

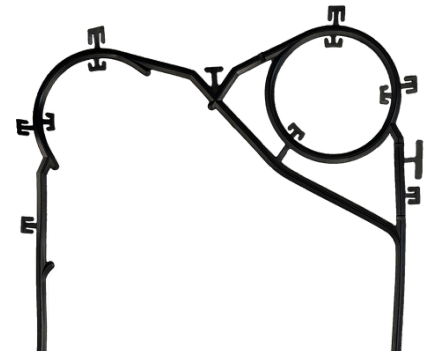

June 2026 featured products are the Caterpillar 3500/3600/G3500 PHE gaskets. Commonly specified during engine maintenance planning, these gaskets ensure reliable sealing for cooler systems where pressure and temperature must be controlled, and fluid separation must be maintained – preventing coolant-to-oil cross-contamination and unplanned downtime.

CATERPILLAR 3500/3600/G3500 PHE GASKETS

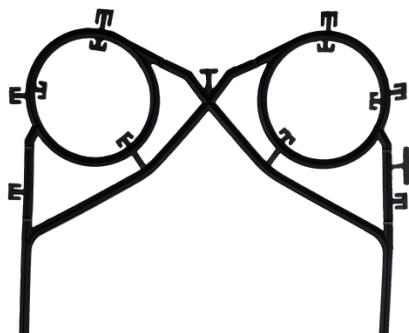

CAT 1492213 Parallel PHE Gasket for Caterpillar 3500/3600/G3500 Heat Exchanger Systems

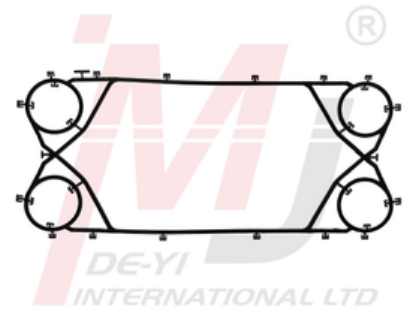

The CAT 1492213 PHE Gasket is used in parallel-flow plate heat exchanger configurations, where cooling media flows through multiple channels simultaneously. In these systems, gasket integrity is essential for maintaining pressure control, temperature stability, and proper media separation.

CAT 4493078 PHE Gasket for Caterpillar 3500/3600/G3500 Heat Exchanger Systems

In these cooling applications, the gasket supports fluid separation, pressure control, and stable heat transfer performance while reducing the risk of leakage and cross-contamination between cooling media. Reliable gasket integrity is essential for maintaining cooling system efficiency.

MJ has a complete product line for various industrial. Please get in touch with us for more. If you have any concerns or questions about making an international purchase, check out our [FAQ](#) page for more details or contact the MJ sales team.
