

December 2025

# MTU S2000 Cylinder Head Gasket and Valve Cover Gasket

As December arrives, we are highlighting a key selection of MTU S2000 engine gaskets that support stable sealing performance in marine and industrial applications. This month's featured items include the cylinder head gasket, outer and inner sealing plates, and valve cover gaskets, parts trusted by importers, distributors, and service specialists seeking dependable aftermarket supply.

## MTU S2000 CYLINDER HEAD GASKET

The MTU S2000 cylinder head gasket (X00029801) is engineered to provide consistent sealing for the combustion chamber, maintaining durability under high thermal and pressure conditions.

Complementing this are the Outer Sealing Plate (X53604200004) and Inner Sealing Plate (X53604200005), both essential in reinforcing the cylinder head structure and ensuring a secure interface between key mating surfaces.

## MTU S2000 VALVE COVER GASKET

In addition, we are featuring the MTU S2000 Valve Cover Gasket X51204200003 and Valve Cover Gasket 5320160221, made to provide tight sealing around the valve cover area and prevent oil leakage during operation. These gaskets offer reliable fitment for maintenance professionals handling routine service or complete engine overhauls.

If you have any questions about these MTU S2000 gaskets or need support with your sourcing requirements, feel free to contact us. For inquiries about international purchases, you can also visit our [FAQ](#) page for helpful guidance or reach out directly to the MJ sales team.
