

July 2026

Parker P/M 24/30 Hydraulic Pump/Motor Gasket

July 2026 featured products are the Parker P/M 24/30 Hydraulic Pump/Motor gaskets. Commonly specified during system maintenance planning, these gaskets ensure reliable sealing for hydraulic systems where pressure and temperature must be controlled, and fluid containment must be maintained – preventing external leakage and pressure loss, and avoiding unplanned downtime.

PARKER P/M 24/30 HYDRAULIC PUMP/MOTOR GASKET

033-91082 Hydraulic Pump/Motor Gasket for PARKER P/M 24/30

The Parker 033-91082 is a mounting flange gasket used in Parker Gold Cup P/M24-30 pump and motor units. It seals the joint between the housing and mounting flange, helping prevent external hydraulic oil leakage at a major structural interface. Commonly replaced during overhaul or housing service, this gasket supports reliable fluid containment and helps reduce the risk of leakage-related downtime in demanding hydraulic operating conditions.

033-91058 Hydraulic Pump/Motor Gasket for PARKER P/M 24/30

The Parker 033-91058 is a blanking plate gasket used in the blanking cover assembly of Parker Gold Cup P/M 24-30 pump and motor units. It seals the blanking plate to the housing, covering and protecting the unused rear drive mounting pad. This gasket is typically replaced when servicing the blanking cover assembly or when converting the unit to a rear drive configuration.

MJ has a complete product line for various industrial. Please get in touch with us for more. If you have any concerns or questions about making an international purchase, check out our [FAQ](#) page for more details or contact the MJ sales team.
